ML Lab (CS360)

Assignment 8

1. Implement SLP (one architecture) for multi-class classification task using Wine dataset. Follow the below-mentioned instructions to implement your code.
   a. Tune the hyper-parameters
   b. Check overfitting issue
   c. Finally report class-wise precision, recall, accuracy and overall accuracy considering 5-fold cross validation.

Please do not copy anyone's code. Try to learn to code.

Thank you
Happy learning
